# Chapter 1

Capitalism is a pyramid scheme, investors/wealthy people don't work but they get higher salaries than the actual workers.

Economic thinking.....*There is no supreme savior (person)* (from the international song).

The economy is engineered it's not natural. The economy should be engineered so that workers solve problems and get high rewards not to give high rewards to investors. Rather have workers be investors within a company and not have external investors/wealthy people be the profiteers.

A friend of a friend is a stranger. The enemy of an enemy is a stranger. Friend of an enemy is a stranger. Can't trust friendly external investors.

What must happen after a revolution?

Revolution are changes/movements to remove a government and reforms are changes/movements to improve a government. If u have a revolution against a democracy, then you are revolting against the people.

Figure 1

Figure 2: Fourth International Logo [1]

Worker co-operation is better than worker competition.

# TECHNOCRATIC ISPOLKOM

## Definitions

### Google definition

Capitalism-an economy in which a country's trade and industry are controlled by private owners for profit.

Communism- an economy where all property is owned by the community and each person contributes and receives according to their ability and needs.

Socialism- an economy where the means of production, distribution and exchange should be owned or regulated by the community.

**My debunk statements for anti-communists (communism= state ownership)-** If the communist economy means having all its property owned by a community, then what is an absolute monarchy system; is it communism. The economic systems are differentiated by profit to whom, sustainability for who, and democracy/control/management at a workplace by who. Trickle-down economics must start the trickle from workers not from capital owners.

**My response to Leninists (vanguard party)-** If communists can't convince opportunists to be communists, then what's the point of communism.

### Which economic system is better for all people?

- A system where the workers are led by capital hoarders and politicians.
- A system where the workers are led by other workers.
- A system where the workers are led by politicians.
- A system where the workers led by \_\_\_\_\_.

An economic system should be reliable, repeatable, controllable, and accurate.

### My Paraphrase

Communism: An economy of the workers by the workers (or the people who support workers) for the workers. Workers State. Control means of production by working.

Socialism: An economy of the community by the community for the community. **What is a community? Is it people of a certain race, unemployed people, revolutionaries, groups of certain people, wealthy people, or politicians.**

Capitalism: An economy of the rich by the rich (or the people who support rich) for the rich. Control the means of production by being rich.

Fascism: Control means of production by being of a particular ethnicity i.e., Apartheid, Nazi, Israel/Palestine etc.

Anarchism is stateless (unsustainable). Free market is anarchy of the economy, and it degenerates to be capitalism.

Monarchy economy is directed by a family.

## Why support the 4<sup>th</sup> international?

**My Strawman argument:** Everyone can be a worker but not everyone can be rich, if the economy must work for everyone then why use capitalism.

Capitalism is proof that the free market is unsustainable. The free market is regulated against poor people.

There must be unity of workers in struggle and resolution/support of other workers, but not in debate nor ideas i.e No puppeteering. In other words we must avoid cult of personalities.

Everyone can be a worker but not everyone can be rich, Everyone can be a worker but not everyone can be white, Everyone can be a worker but not everyone can be black, Everyone can be a worker not everyone can be an engineer, Everyone can be a worker but not everyone can be school teacher, Everyone can be a worker not everyone can be doctor/nurse, Everyone can be a worker not everyone can be soldier, Everyone can be a worker but not everyone can be a maid, Everyone can be a worker but not everyone can be a politician etc.

Investor Capital without labour is a pyramid scheme. Labour without investor capital is good business.

There were 4 internationals for communist/socialists, the first, second and fourth international advocate for a worker driven or dictated economy and the benefits go to the workers instead of going to the capital (wealthy) owners.

The 3<sup>rd</sup> international makes an excuse for the politicians to be the vanguard of communism i.e., the revolutionary politicians become ministers of industries or managers of SOEs without any research education nor a good work experience on the industry they are willing to manage. The third international is dead. The third international has no democracy, a degeneration of workers from leadership and too much loyalty to the party and not to the citizens nor people.

1<sup>st</sup> international- International workingmen's Association (IWA).

2<sup>nd</sup> international- Anti-colonization and antiwar.

3<sup>rd</sup> international- USSR (An economy of the politicians by the politicians (or the people who support workers) for the workers), socialism in one country.

4<sup>th</sup> international- Trotskyism (permanent revolution), dictatorship of workers and permanent revolution.

5<sup>th</sup> international- Derivation of 4<sup>th</sup> international.

### Quick Question

Do you know what left communism is?

### Why don't I support capitalism?

It's an economic system built to support or maintain the dominance of a few groups of individuals (capital hoarders). The capitalistic system prospers well through division of labour, society, economy etc. Capitalists can promote equality through capitalism, it is not a unifying system hence it will always fail in fact capitalism won't fail but the people under capitalism will suffer. The workers will always get peanuts compared to what the capitalist can squeeze out of the laborers. Capitalists simp for rich people and communists simp for workers.

A functioning big government of the people mainly governed by the workers would be more reliable compared to a capitalist economy or a non-statist society.

What is the difference between libertarians and anarchists?'

I think anarchists are worker based anti-state and libs are wealthy anti state.

Figure 3

## How can a worker sensitive economy be implemented?

1. **4R process= Random selection of workers, meet Requirements (education and work experience, etc.), Regulations (discipline, ethics and safety, laws based on workers, etc) for good governance and Rotation of workers.** The 4R process is for leadership.
2. The 4R process can be applied in the private sector and the public sector. Random selection is to prevent people from organizing crime in the business, people must be strangers or utmost be worker comrades not criminal comrades. The Requirements are to ensure that the workers have minimum education/skill or work experience; a teacher must be good at teaching, an engineer must be good at engineering, a doctor must be good at doctoring, police must be good at policing etc. Rotation is for term limits to prevent (Cult of personality) dictators staying in power, management must have rotation. For some cases the rotation might not happen as per time interval, but instead as project completion. Regulation is for learning from lessons of the past and improving what's improvable, cancelling what needs to be canceled and bringing in innovations or creativity.
3. Use reformation not revolution. For democratic rule don't use revolution, because a revolution leads to extreme conditions it leads to anarchy or dictatorship by the revolutionaries and politicians.
4. Identify problems and identify good solutions for problems. The strikes and revolt/protests won't always bring good solutions.
5. **A worker's council must be part of parliament. The workers must be elected by other workers (union workers or non-union workers). The working council are not politicians or serve the interests of politicians. Their work is to be like the lawyers in parliament, i.e., to verify or rectify the ideas, laws, and fantasies (unrealistic expectations) of politicians to make them realistic and appropriate for workers. The workers can be reform workers, revolutionary workers, political workers etc.**

## Arrest diploma mill graduates

6. **Bigger profits must go to workers, not capitalists/revolutionaries nor politicians.**
7. The tax payment must not start from top to bottom but instead should start from bottom towards the top. The tax allocation moves from local government planning, improvement, and maintenance of services and other things. The tax moves from local to provincial management and then to national government. After all the planning and implementation, the excess money is sent back to provincial and local projects/worker-based projects.
8. **The people who pay tax must be rewarded by the government when the country is booming.**
9. The taxation of finalized goods can be a portion of the goods produced to be sold. Service industries get money taxed. The portion of food taxed is sold by the government or supplied to welfare or workers.
10. When public teachers don't attend school, they get deducted salaries, and the money is given back to parents/taxpayers. When government workers are lazy their salaries must be deducted.
11. **Welfare must be for poor employed workers who pay tax, not unemployed people. For poor workers who are temporarily unemployed there must be a time limit for them to find another job so that they can be on welfare (maybe 3 months).**
12. Trickle-down economics must be workers tricking down money to the masses rather than the capitalists trickling money down to the masses.

13. Workers must self-emancipate and not rely on being guided by non-workers or union leaders who hoard power (why is there no rotation of leadership).
14. There should be a private company which will monitor public industry corruption and a public company to monitor private industry corruption. Reports are made public for the people. These companies must not be used as smearing tools, the reports must be true and unbiased towards a party/ towards a company.
15. Some government investment should go to best performing (profit and supportive to workers) logarithm scale measured private businesses that pay full taxes.
16. A worker must have more than one career. Be a doctor and engineer/ be an actor and a lawyer etc., make your own choice which career you want but don't rely on one career. Multi career.
17. When the economy is in profit the reward money is given to workers who pay tax.
18. Colonialism-foreigners oppressing natives. Right wing Nationalism- natives oppressing foreigners.
19. The elections of presidents/political parties, each voter must vote for 5 political parties. If a vote does not have 5 selections it does not count. There must be term limits for a political party at winning elections/being the governing. After 8 years their vote must not go to count for them to be president. They will be members of parliament though and then after 4 years will be eligible to be elected for presidency.
20. A tyrant is useless without workers.
21. Every 20 years the constitution must reviewed and re-amended.
22. Government aid/welfare to workers. Tax collected must subsidize workers instead of investors or wealthy people.
23. Use Lateral mobility instead of vertical mobility for employment (management is not priority, instead multiple career paths must be made by each worker). A worker must have multiple qualifications.
24. What's a tyrant without workers. Workers must unite and develop against tyranny.
25. Workers council > political party competition.
26. Politicians are salespeople, they sell dreams. Politicians' currency=votes. Capitalist currency=money. Communist currency= problem solving/working.
27. If you weren't lucky at your lowest moment, where would you be?
28. I propose equal income for all public workers i.e national government, military, police, Soe workers, parliament workers, municipalities etc. This is to reduce unnecessary bureaucracy and put pressure for solutions to problems instead of wealth pursuits.
29. For unity of two or more countries there must be elections in which the two countries must win support votes by 70% (at each country) for strong workers or potential workers support. The parliament members are combined and rotates among the countries yearly. The laws are redefined so that the two countries agree on which issues or laws to support/work on. There is absolute/totalitarian renewal of the two/more countries into one (what laws apply in country A also apply in country B).
30. Increase tax on property income, property that is not valuable (valuable from hype not from its capabilities) and reduce tax on worker income. Increase tax on property which is not used/decrease value of unused land and subsidies profitable worker incomes (essential workers which are making small money).
31. Collectivisation must be done on unused land or property/state absorbed property.
32. For pricing a product or service must have minimum price > production cost, max. price < (production cost +(production cost/2))

33. Singularity of the economy is inefficient. Diversify.

## Unions should have their own enterprises

- 34. The companies/people that pay tax can be rewarded when government GDP is high.
- 35. Appointed ministers are people with education and experience of the department.
- 36. The police must not be replaced by military. THE MILITARY is for external threats, but the police is for internal threats. If there was a global country run by workers would there be a need for militarisation?
- 37. Mandatory tutorials and extra classes for university and school students. Time limit to student funding and project funding.
- 38. Retirement investment is unreliable, people can save money in their own savings. What are the chances that people will until 60-65?
- 39. Use of worker constitution instead of liberal constitution.
- 40. Tax the loans and profits.
- 41. What is the point of free education if people don't get jobs?
- 42. Poor countries must trade together more often than they do with rich countries. Especially trade on developmental things/projects. To avoid being tricked by rich countries.

Figure 4: A scene from The Wire [2]

- 43. There should be a limit to how much a one person/company/family corporation can own LAND. The other land must be rented. This is to allow more potential ownership for land by many/all people.
- 44. Culture is for and by the people, it is not for monarchies.
- 45. Money should have a limit for each person on what he/she must buy. Buying must proportion if there is excess then products don't have to be proportion. Money should not be capable of buying everything. There should be a limit to what money can be used for. Rich people should not be allowed to buy everything.
- 46. To be an investor you must be from within the company not an investor who is not working in the company.
- 47. Why have death sentence instead of the free prison labour.
- 48. Prison labour must be punishment labour.
- 49. Protests are not the same as riots. Protests are constructive movements and about awareness, but riots are criminal destructive movements.
- 50. In a riot situation the thieves and other rioters are served a punishment tax for minimum 3 years.
- 51. Troika as presidency of the worker's state. Not cult of personality.
- 52. Municipal workers council elect 10 delegates to provincial council, then provincial workers council elect 10 delegates to national workers council.

- 53. SOEs must develop themselves and not be static or wait for tax aid.
- 54. If banks, make a profit the banks must pay the customers or the people of which the bank took from. The fractional reserve practice of banks must pay customers/clients.
- 55. No to anarchy, no to monarchy, no to wealth-based economy, no to dictatorship and no to martyrdom. Yes, to worker control.
- 56. Economy must be defined by work-based profiteering e.g., entrepreneurship (Sole proprietorship), union owned companies, worker controlled SOEs, private companies (international and local) with workers, worker co-ops, patron businesses and any worker supportive enterprises/companies.
- 57. Advertising should be for healthy products; unhealthy foods must not be advertised.

## Owners of unused land must be penalised.

- 58. Increase tax on generational wealth.
- 59. Capital gains tax of a company must be used to pay workers of that company.
- 60. Every company pays the same tax rate. No tax breaks/ incentives/charity tax. Everyone is taxed by the same percentage, no tax brackets.
- 61. Avoid government and private industry corruption. Government leadership randomization might be useful for fighting corruption.
- 62. Corrupt ministers must face lawsuits by the public/people. Anyone can do a lawsuit against the government minister. Money must come out of their personal wallets. The ministers must work for local public entities for free/no salary. They must be in jail and work for forced public hard labour (build roads, schools, cut grass etc.). They should use public services like any poor person. Jail must have brainwash techniques to change people's mind to do good things, instead of people being freed from prison and preferring to do bad things again.

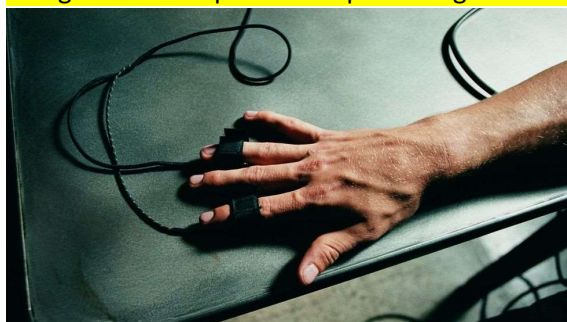

Figure 5: Polygraph Test [3]

- 63. A polygraph test must be compulsory used in courts for the people being asked questions (Victims, defendants, and witnesses) to tell the truth. If we rely on sham trials, then innocent people might be purged.

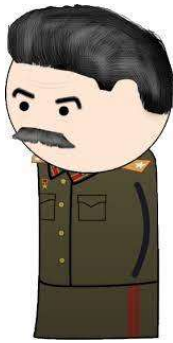

Figure 6: Joseph Stalin [4]

Figure 7: Maximilien Robespierre [5]

Figure 8: Alexey Mikhailovich Schastny

Figure 9: Nongqawuse and her fellow prophet

64. Research and development projects must have finite resources and time limits.
65. Bartering must be legal and have a standard or group of tradable items i.e., quantity and quality, time before expiration date and production process must be standardized. This is to prevent illegal bartering.
66. The government should fine businesses that don't keep their work areas clean.

Sectors of the economy: NGOs, state owned (diversified research) .

Union(uniform research) owned start-ups these start ups must not plagiarize other companies.worker co-operatives(profit) .

Private locally owned(profit) . International owned. Experimental company.

67.

68. Sectors of the economy can also be summarized to be:

- collectivized industries (state owned enterprise/ public works). The SOE is for profit and the public works are tax provided services.
- Union owned companies.
- private worker cooperatives. The cooperatives can join a stokvel of other worker cooperatives, but must not join stock market (casino).
- Petty bourgeoisie enterprise, i.e., small businesses

69. Public statues and monuments are a waste of money. Museums are better.

70. The art of short selling businesses must be used when the economy is bullish. When the economy is super bearish /when the economy is struggling short selling is closed/temporarily stopped.

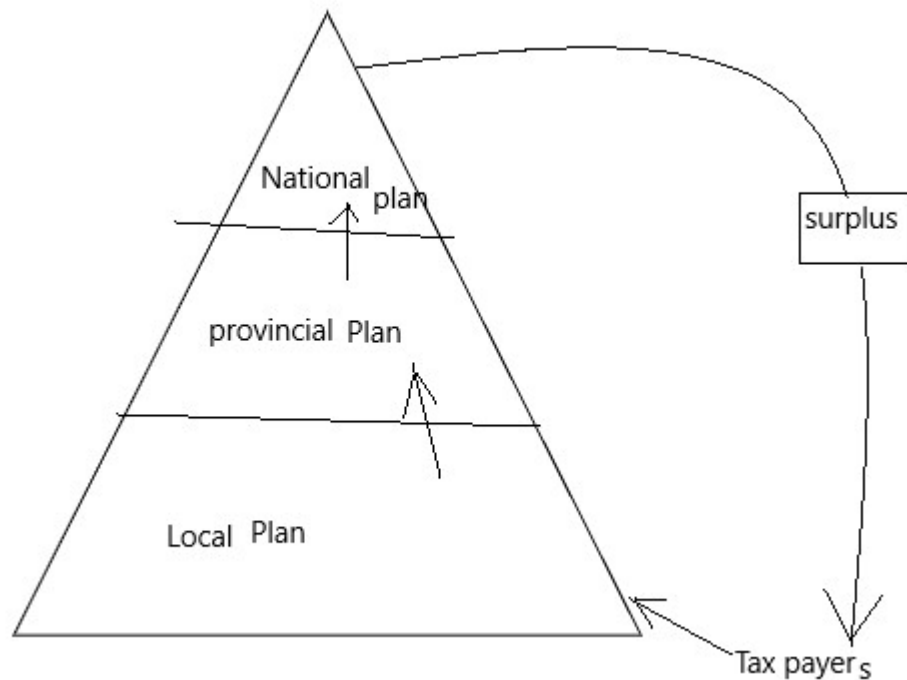

71. RDP houses must be randomly monitored yearly to see if people live there.

72. Cameras must be mandatory in cars. For traffic officers to arrest people who cause accidents or do reckless driving.

73. I would like to encourage people to debate and develop ideas for labour development.

74. When an investor is guilty of insider trading his/her profit, property and assets are liquidated and given to poor workers.

75. Tax is used in local government then used in provincial government and lastly the surplus is used in national government. The national government can redistribute money to poor communities.

76. National Plan must be strategic, Provincial plan must be operational and Local plan must be tactical.
77. If traffic officer or police is being bribed by a person, the bribing person can record the bribe and win money from the police officers' salary. The bribery must be investigated using a polygraph test.

## Opposition parties are bafana bafana

Government aid programs rdp, food aid, water, nsfas must help poor and be regular checked to see if people are staying in the house or people are studying and passing. If people are lying they must be sent to jail.

Government officials must not have international bank accounts.

Bartering for raw materials is at weight  
animals are on size. Bartering for  
manufactured goods with manufactured  
goods is on auction. Bartering for  
manufactured (in that country) goods is on  
a scale of importance for society and  
economy ie patents products .

People who claim election fraud but don't  
have proof must be arrested

## Light industry f

Light industry for private sector (union companies, worker cooperations, patrons businesses). Heavy industry for public sector (public works, soe, state control)

From my Huawei Notepad

## Right wing is su

Right wing is supremacy and separation. Left wing is equality and unity. In a Supremacy system there is no cooperation, only competition and replacing supremacy with new supremacy.

From my Huawei Notepad

## Reliability

Reliability, repeatability, controllability and accuracy tests for ideas and theories.

From my Huawei Notepad

## Terrorism is won

Terrorism is won by terrorists. Revolution is won  
by revolutionaries (blanquists). Debate is won  
by the masses.

From my Huawei Notepad

Functionality and technicalities > aesthetic and  
bureaucracy.

From my Huawei Notepad

## Internal investm

Internal investment rather than outside  
investment. I.e. Investment dependency from  
workers in a company or government, rather  
than from investors who aren't working.

From my Huawei Notepad

## Universality o

Universality in skill of workers. Workers must gain more than one career.

From my Huawei Notepad

## Direct democracy

Direct democracy for long term policies [more than 5 years].

Representative democracy for short term policies [less than 5 years].

Petrograd soviet council style of government.

Ministries are represented by nqf 8 level educated workers.

From my Huawei Notepad

## Trade unions mus

Trade unions must mandatorily build and control their own companies.

From my Huawei Notepad

## state workers sa

Minimum wage < All state workers salary < 45%  
of tax collected. Higher bonuses as per level of  
education or qualification.

From my Huawei Notepad

## Free Market is a

Free Market is anarchy for economy

From my Huawei Notepad

## Vanguard revolut

Vanguard revolutionary is like a white saviour.

From my Huawei Notepad

## Outmaneuvering c

Outmaneuvering capitalism instead of clashing

or constant protests or revolution.

Change of revolution ends when revolution or

protest or clashes end.

From my Huawei Notepad

Figure 24

Figure 25

- ❖ Protectionism must be used to regulate the economy to support and improve/develop local workers.
- ❖ [Marriage] In a divorce settlement 50/50 must stop. Money to support must be a percentage of money relative to the salary of the lower earning partner. i.e., if a rich wife must pay her husband, the money must be relative to the salary of the non-rich husband.

❖ Marriage is waste of money. Supporting your (wife/husband) and kids is good.

### Why I'm not Marxist.

1. I did not read any Marxist books or thought.
2. I don't agree with Leninism/ Maoism.
3. I don't agree with the theory that suggests workers from developed countries will build communism. Communism can be built from undeveloped countries by workers.
4. Why does capitalism have to fully mature before workers push for change towards communism. I don't support the two-stage theory.
5. I don't support the idea of Marxism as a bible/religion for workers development (struggle). The debate must be of how to develop workers not how to develop workers using Marxist thought.
6. I do not think that there are only two classes (workers and wealthy people) in socio-economic development. I think political class and religion class influence the economy and society. How can there be only workers and wealthy people classes in apartheid South Africa or in Nazi Germany or in Soviet Union or Iran etc. The politicians the control narrative for gender, race, and identity politics. The religions control the faith/ belief in leadership as being essential/ natural (By God).

### Miscellaneous and Random

How can the people (democracy) reverse anarchy?...

<hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>
---

Dear reader, how can you improve socialism and communism to be effective and efficient?

---

---

What's the difference between shock therapy and revolution?

---

What's the difference between anarchy and liberty (no government)?

---

Why do unions support individual parties, why not support multiple parties?

I say trickle down economics must be from the workers in a worker based (bigger profits to the workers), what do u say?

Screw MATHS LIT it sabotages potential mathematics related work. A maths lit educated individual cannot do maths related jobs, but a maths educated individual can do maths lit jobs.

I say multiple careers can help more people not to rely on one career, what do u SAY DAWG?

Shouldn't banks owe bank customers their (the bank) profits.

The first rule of discussion club is: **you do not talk about Discussion Club**. The second rule of Discussion Club is: you DO NOT talk about Discussion Club! Third rule of Discussion Club: if someone yells "stop!", keeps quiet, or taps out, the debate is over. Fourth rule: only two people to a debate.

Figure 30: National debt

[6]

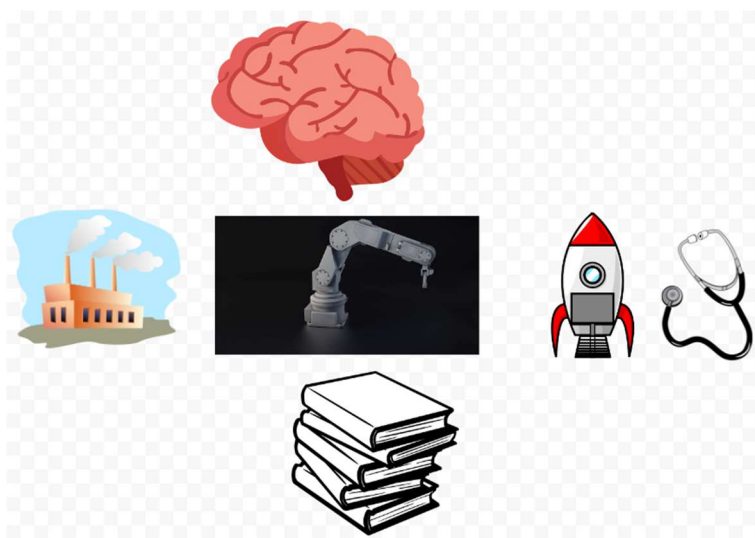

Figure 31

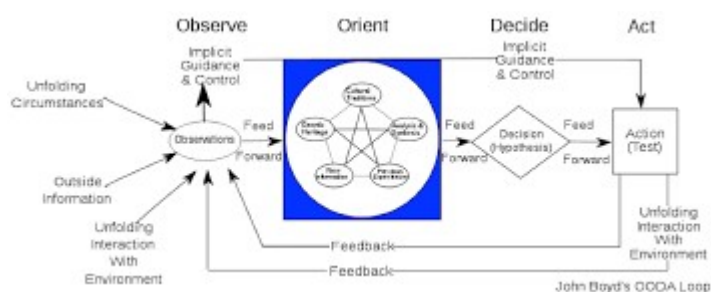

Figure 32 :OODA Loop

[7]

### Who is preferable for leadership?

1. Politicians who want electoral votes or populist support.
2. Workers who solve problems.
3. Capitalists who want to hoard profit.

### Do you know Tika Taka?

I think strategy for development should be perfect timing and effective/efficient control of finance.

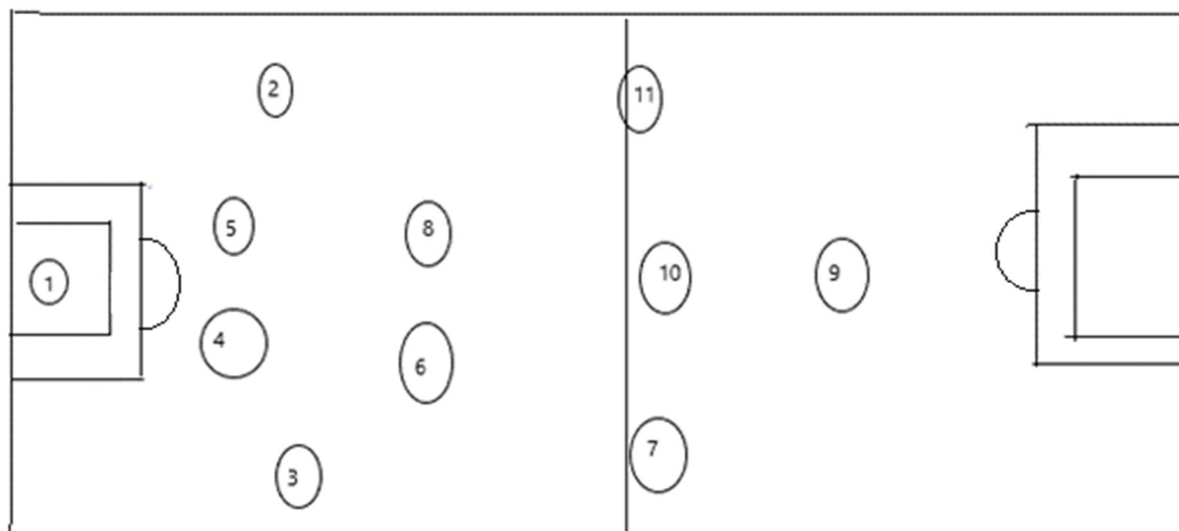

Figure 33: The coach is the president/parliament.

4=military/defence

5= police/security

6=engineering/science research (STEM)

8=education system

10=medicine/health sector

11=(patron) financial sector/banks

7=Journalism/news media

3=Prison rehabilitation and prison labour

2=Welfare, government services and Tax

9=entertainment

Other issues can be substituted.

#### Further proposal

The needs and wants theory should be improved. Needs= things desired for survival (food, water, clothes, and shelter). Wants= Things desired but not for survival. My proposal is that needs be replaced by functionality of things, then wants can be replaced by aesthetics of things.

Functionality is not just for survival but also for usefulness i.e. (needs, cars, education, technology, etc). Aesthetics is as wants, its functional and unnecessary.

#### About the Russian civil war

All practical work in connection with the organisation of the uprising was done under the immediate direction of Comrade Trotsky, the President of the Petrograd Soviet. It can be stated with certainty that the Party is indebted primarily and principally to Comrade Trotsky for the rapid going over of the

garrison to the side of the Soviet and the efficient way the work of the Military Revolutionary Committee was organized. -Joseph Stalin [8]

Julius Martov said: "The beast has licked hot human blood. The man-killing machine is brought into motion... But blood breeds' blood... We witness the growth of the bitterness of the civil war, the growing bestiality of men engaged in it." [9]

## Chapter 2

1. Why do directors think that they are the only film painters/artists the actors, cast and crew are also painters and artists to the movies. Everyone paints his part.
2. Why are children allowed to work in film factories but not allowed to work in cars, clothes, and other forms of factories?

[This chapter is for stories/short scripts/movies about workers. You can write your own movie/script about workers]

## Chapter 3

English does not make sense; it has no sense. The singular and plural words don't add up. For instance, why is the singular word man have a plural as men..... smh 😞, it's a bit confusing for us to understand because English is not our mother tongue. What exactly are the English rules for language building because there are plenty of exceptional words. The plural of person is people, how can anyone without a good English vocabulary predict the plural of man or person.

The following words are some of the words which are confusing:

Car-cars	ant-ants	Person-people	chicken-chickens	cow-cows	<Cow
and chicken>	fan-fans	woman-women	man-men		

English does a lot of plagiarism from other languages; it does not have to paraphrase words. The words which are taken from other languages are spelled the same as if they are used in their original language. Some words are not plagiarized but their use in English is not relevant to other words from English e.g., physical has a ph not an f or the spelling of light with a gh; why not use lite as light.

## Chapter 4

1. Does the big bang have a repetition?
2. How huge is the universe and how huge is the area or volume or dimension outside the universe? What about the ancestors, dinosaurs and Australopithecus existence being erased by religion.
3. Y.O.L.O.
4. Colonization of Africa.
5. Egypt monuments were built by workers not by aliens or mythical elements.

Those are some of my atheist thoughts.

Ideas last longer than personalities. Most people don't care about who invented something, people care how to use it, how to improve it, how to replicate and other useful ideas.

Workers are necessary to help the people when a country gets a natural disaster/ when the planet gets a natural disaster or when the universe gets a natural disaster. The capital owners don't necessarily have skills to solve natural disasters they can hoard money to buy out land or screw over other people if they want to (charity is unreliable).

Prayer is not going to solve problems. Problems get solved by solutions from researchers and workers. Improvement and maintenance of everything can be done by workers and not politicians or capitalists or preachers.

Long-haired preachers come out every night  
To tell you what's wrong and what's right  
But when asked how about something to eat  
They will answer in voices so sweet:

You will eat, bye and bye  
In that glorious land above the sky  
Work and pray, live on hay  
You'll get pie in the sky when you die.  
That's a lie

*Lyrics from a song called pie in the sky*

## About the author

My nickname is Blade Da Plug, I am a South African, I am not an economist, I am not a Marxist (Marxism must not be religious), I am not a working-class revolutionary, I support working class reform, I don't have membership at any communist/socialist society or organization. I think I am a Trotskyist.
